

Alliance of Technology Transfer Professionals

Successfully moving technology from research to the marketplace by unifying and educating technology transfer professionals around the world.

Background

- Technology Transfer is increasingly viewed as a profession
- Professions require certain things:
 - A body of knowledge
 - A professional body
 - A recognised path for career profession

Supported by members

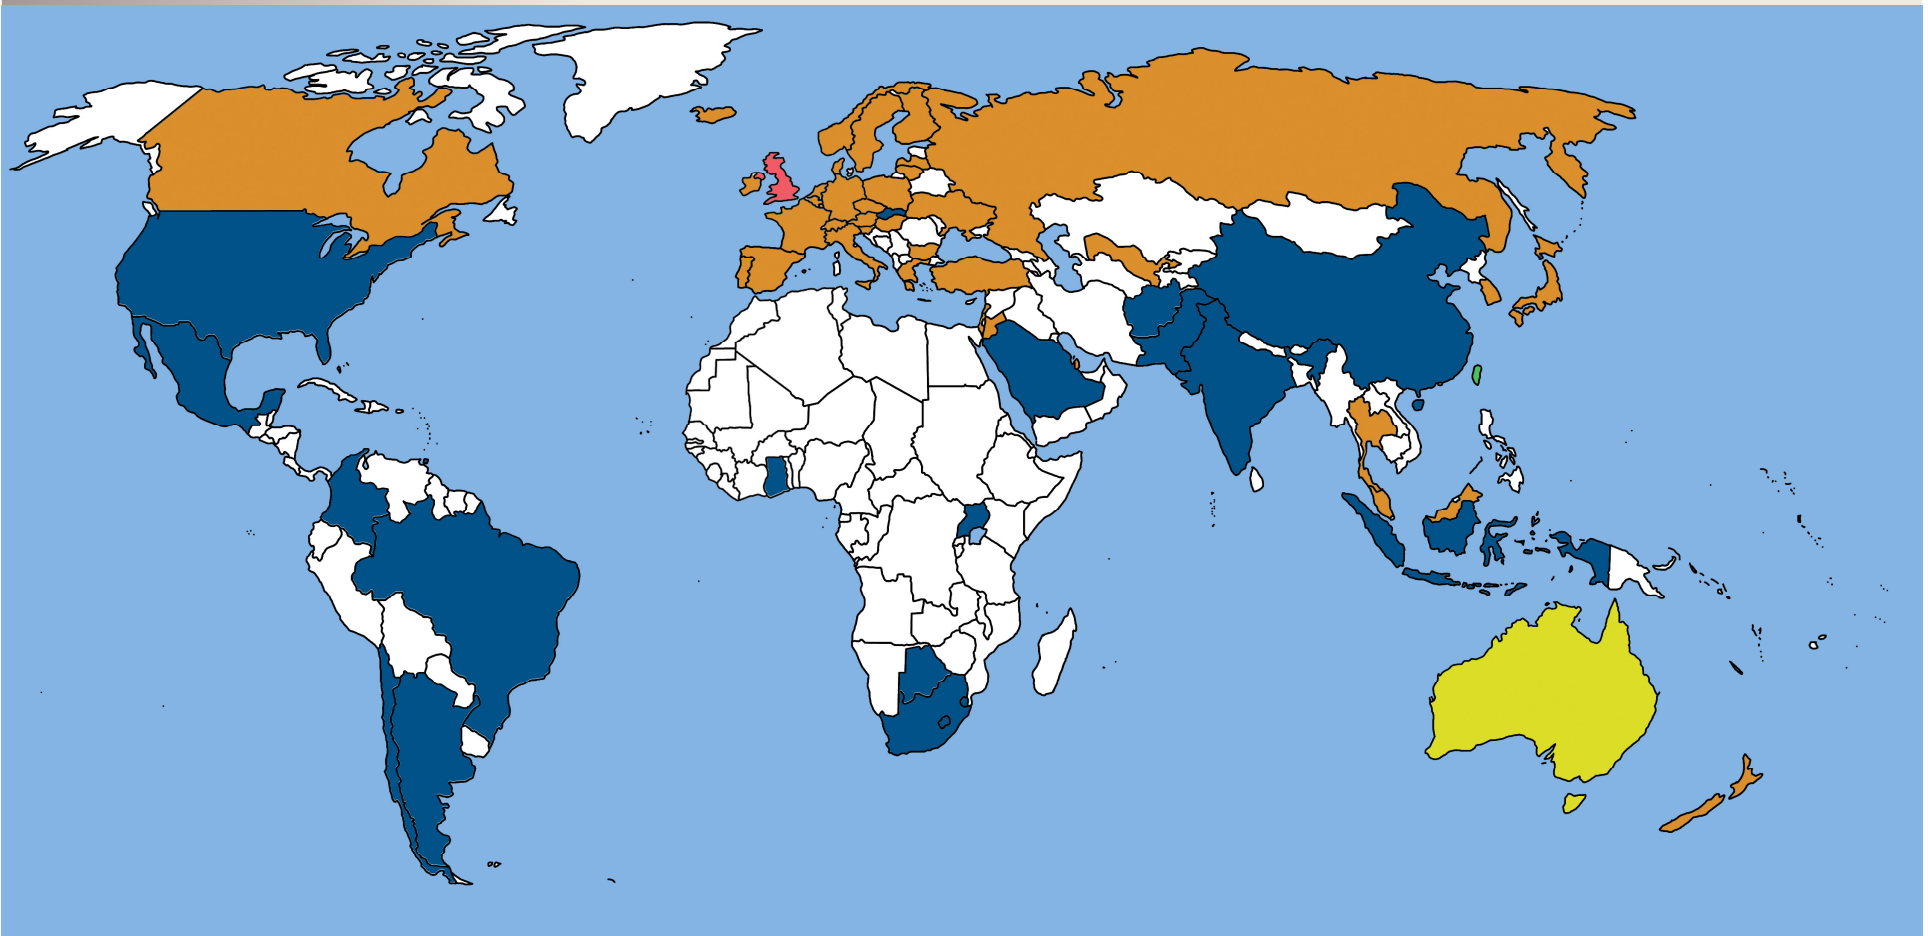

summer 2008: PraxisUnico, AUTM and ASTP carried out research amongst our members

- Wide-ranging support for development of professional recognition mechanisms
- Greatest support amongst the younger/newer members of Tech Transfer
- Strong view that development of the profession is happening and that we must take a leadership role.
- Strong view that development of the profession must be led by practitioners
